

Pentru Ubuntu for Windows aveti nevoie de Windows 10.

1. Deschide Microsoft Store
2. Cauta Ubuntu
3. Instaleaza Ubuntu
4. Deschide un PowerShell cu drepturi de Admin (Run as administrator)
5. Ruleaza comanda: `Enable-WindowsOptionalFeature -Online -FeatureName Microsoft-Windows-Subsystem-Linux` in PowerShell
6. Restarteaza calculatorul
7. Porneste Bash-ul, ruland comanda `bash` intr-un CMD sau PowerShell
8. Acum ai Bash in Windows

VSCode:

Windows (64 biti)

- Acceseaza => <https://code.visualstudio.com/>
- Descarca VSCode
- Instaleaza VSCode
- Acum ai VSCode pe Windows

Linux (distributii de Ubuntu si Debian pe 64 biti)

- Acceseaza => <https://code.visualstudio.com/>
- Descarca VSCode versiunea .deb (vezi imaginea de mai jos)

- Deschide un terminal in folderul in care s-a descarcat fisierul
- Ruleaza comanda `sudo apt install ./<file>.deb`
- Acum ai VSCode pe Linux
